Short Product Description

The Double-Sided Soft Grip Crystal HD® Mirror delivers bright, clear visibility from both sides of the mirror head, helping clinicians maintain visualization without interrupting workflow.

Full Product Description

The Double-Sided Soft Grip Crystal HD® Mirror features dual Crystal HD® lenses that allow clinicians to maintain visibility without flipping or repositioning the instrument. This supports smoother workflow and uninterrupted focus during exams and procedures.

Its true one-piece, non-metal construction eliminates corrosion buildup and galvanic shock. A lightweight, ergonomic soft-grip handle provides comfortable, stable handling throughout the day.
